Subject index

Volume 87 (1997)

Acetylenic; NMR spectroscopy; Positional isomers; Synthesis; Unsaturated tellura; Stearate analogues **87, 55**

Acyl chains; Liposomes; Lipid peroxidation; Cholesterol **87, 17**

Aging; Hydroxy fatty acids; α -hydroxyaldehydes; LDL; Rheuma **87, 81**

Alcohol action; ESR; apoB; LDL **87, 125**

Anandamide; *N*-acyl phosphatidylcholine; *N*-acylethanolamine; Mass spectrometry; Macrophage **87, 103**

Antioxidant activity; Plastoquinol; α -Tocopherol quinol; Ubiquinol; α -Tocopherol; Lipid peroxidation; Liposome **87, 73**

Antiproliferative activity; Nucleoside-5'-alkylphosphonophosphate; Nucleoside-5'-alkyldiphosphate; Nucleoside-phospholipid conjugates; Fast atom bombardement mass spectrometry (FAB-MS); Electrospray ionizations mass spectrometry (ESI-MS) **87, 31**

apoB; ESR; LDL; Alcohol action **87, 125**

Asymmetric phosphatidylcholine; Time-resolved X-ray diffraction and calorimetry; Electron spin resonance; Metastable non-interdigitated gel lamellar phase **87, 111**

Bicyclic fatty acids; Cyclic fatty acids; Frying oils; Gas chromatography (GC); High-performance liquid chromatography (HPLC); Mass spectrometry; Silver ion chromatography; Sunflower oil **87, 137**

Biosensors; Gangliosides; Polydiacetylene; Monolayers **87, 41**

Cationic liposomes; Transfection; Sphingosine; Diacylglycerol **87, 23**

Cholesterol; Liposomes; Lipid peroxidation; Acyl chains **87, 17**

Cyclic fatty acids; Bicyclic fatty acids; Frying oils; Gas chromatography (GC); High-performance liquid chromatography (HPLC); Mass spectrometry; Silver ion chromatography; Sunflower oil **87, 137**

Diacylglycerol; Transfection; Cationic liposomes; Sphingosine **87, 23**

Ebselen; Hydroxy fatty acids; α -Hydroxyaldehydes; Lipid peroxidation; Porcine heart tissue **87, 149**

Effective surfactant to lipid molar ratios; Stratum corneum lipid liposomes; Liposome solubilization; Interaction stratum corneum liposomes with decyl, dodecyl and tetradecyl pyridinium bromide surfactants; Static light scattering changes; Partition coefficients **87, 159**

Electron microscopy; Phospholipid; Phosphatidylcholine; Liposome; Vesicle; Freeze fracture **87, 65**

Electron spin resonance; Asymmetric phosphatidylcholine; Time-resolved X-ray diffraction and calorimetry; Metastable non-interdigitated gel lamellar phase **87, 111**

Electrospray ionizations mass spectrometry (ESI-MS); Nucleoside-5'-alkylphosphonophosphate; Nucleoside-5'-alkyldiphosphate; Nucleoside-phospholipid conjugates; Antiproliferative activity; Fast atom bombardement mass spectrometry (FAB-MS) **87, 31**

EPR spectroscopy; Spin label; Ethanol; Polymyxin B; Phosphatidylcholine; Phosphatidylglycerol; Myelin basic protein **87, 1**

ESR; apoB; LDL; Alcohol action **87, 125**

Ethanol; Spin label; EPR spectroscopy; Polymyxin B; Phosphatidylcholine; Phosphatidylglycerol; Myelin basic protein **87, 1**

Fast atom bombardement mass spectrometry (FAB-MS); Nucleoside-5'-alkylphosphonophosphate; Nucleoside-5'-alkyldiphosphate; Nucleoside-phospholipid conjugates; Antiproliferative activity; Electrospray ionizations mass spectrometry (ESI-MS) 87, 31

Freeze fracture; Phospholipid; Phosphatidylcholine; Liposome; Vesicle; Electron microscopy 87, 65

Frying oils; Bicyclic fatty acids; Cyclic fatty acids; Gas chromatography (GC); High-performance liquid chromatography (HPLC); Mass spectrometry; Silver ion chromatography; Sunflower oil 87, 137

Gangliosides; Polydiacetylene; Monolayers; Biosensors 87, 41

Gas chromatography (GC); Bicyclic fatty acids; Cyclic fatty acids; Frying oils; High-performance liquid chromatography (HPLC); Mass spectrometry; Silver ion chromatography; Sunflower oil 87, 137

Gemini; Synthesis; Neoglycolipid; Monolayers 87, 91

High-performance liquid chromatography (HPLC); Bicyclic fatty acids; Cyclic fatty acids; Frying oils; Gas chromatography (GC); Mass spectrometry; Silver ion chromatography; Sunflower oil 87, 137

α -Hydroxyaldehydes; Ebbsen; Hydroxy fatty acids; Lipid peroxidation; Porcine heart tissue 87, 149

α -hydroxyaldehydes; Hydroxy fatty acids; LDL; Rheuma; Aging 87, 81

Hydroxy fatty acids; Ebbsen; α -Hydroxyaldehydes; Lipid peroxidation; Porcine heart tissue 87, 149

Hydroxy fatty acids; α -hydroxyaldehydes; LDL; Rheuma; Aging 87, 81

Interaction stratum corneum liposomes with decyl, dodecyl and tetradecyl pyridinium bromide surfactants; Stratum corneum lipid liposomes; Liposome solubilization; Static light scattering changes; Effective surfactant to lipid molar ratios; Partition coefficients 87, 159

LDL; ESR; apoB; Alcohol action 87, 125

LDL; Hydroxy fatty acids; α -hydroxyaldehydes; Rheuma; Aging 87, 81

Lipid peroxidation; Ebbsen; Hydroxy fatty acids; α -Hydroxyaldehydes; Porcine heart tissue 87, 149

Lipid peroxidation; Liposomes; Acyl chains; Cholesterol 87, 17

Lipid peroxidation; Plastoquinol; α -Tocopherol quinol; Ubiquinol; α -Tocopherol; Antioxidant activity; Liposome 87, 73

Liposome; Phospholipid; Phosphatidylcholine; Vesicle; Electron microscopy; Freeze fracture 87, 65

Liposome; Plastoquinol; α -Tocopherol quinol; Ubiquinol; α -Tocopherol; Antioxidant activity; Lipid peroxidation 87, 73

Liposomes; Lipid peroxidation; Acyl chains; Cholesterol 87, 17

Liposome solubilization; Stratum corneum lipid liposomes; Interaction stratum corneum liposomes with decyl, dodecyl and tetradecyl pyridinium bromide surfactants; Static light scattering changes; Effective surfactant to lipid molar ratios; Partition coefficients 87, 159

Macrophage; *N*-acyl phosphatidylcholine; *N*-acylethanolamine; Anandamide; Mass spectrometry 87, 103

Mass spectrometry; Bicyclic fatty acids; Cyclic fatty acids; Frying oils; Gas chromatography (GC); High-performance liquid chromatography (HPLC); Silver ion chromatography; Sunflower oil 87, 137

Mass spectrometry; *N*-acyl phosphatidylcholine; *N*-acylethanolamine; Anandamide; Macrophage 87, 103

Metastable non-interdigitated gel lamellar phase; Asymmetric phosphatidylcholine; Time-resolved X-ray diffraction and calorimetry; Electron spin resonance 87, 111

Monolayers; Gangliosides; Polydiacetylene; Biosensors 87, 41

Monolayers; Synthesis; Gemini; Neoglycolipid 87, 91

Myelin basic protein; Spin label; EPR spectroscopy; Ethanol; Polymyxin B; Phosphatidylcholine; Phosphatidylglycerol 87, 1

***N*-acylethanolamine;** *N*-acyl phosphatidylcholine; Anandamide; Mass spectrometry; Macrophage 87, 103

***N*-acyl phosphatidylcholine;** *N*-acylethanolamine; Anandamide; Mass spectrometry; Macrophage 87, 103

Neoglycolipid; Synthesis; Gemini; Monolayers 87, 91

NMR spectroscopy; Acetylenic; Positional isomers; Synthesis; Unsaturated tellura; Stearate analogues 87, 55

Nucleoside-5'-alkyldiphosphate; Nucleoside-5'-alkylphosphonophosphate; Nucleoside-phospholipid conjugates; Antiproliferative activity; Fast atom bombardement mass spectrometry (FAB-MS); Electrospray ionizations mass spectrometry (ESI-MS) 87, 31

Nucleoside-5'-alkylphosphonophosphate; Nucleoside-5'-alkyldiphosphate; Nucleoside-phospholipid conjugates; Antiproliferative activity; Fast atom bombardment mass spectrometry (FAB-MS); Electrospray ionizations mass spectrometry (ESI-MS) 87, 31

Nucleoside-phospholipid conjugates; Nucleoside-5'-alkylphosphonophosphate; Nucleoside-5'-alkyldiphosphate; Antiproliferative activity; Fast atom bombardment mass spectrometry (FAB-MS); Electrospray ionizations mass spectrometry (ESI-MS) 87, 31

Partition coefficients; Stratum corneum lipid liposomes; Liposome solubilization; Interaction stratum corneum liposomes with decyl, dodecyl and tetradecyl pyridinium bromide surfactants; Static light scattering changes; Effective surfactant to lipid molar ratios 87, 159

Phosphatidylcholine; Phospholipid; Liposome; Vesicle; Electron microscopy; Freeze fracture 87, 65

Phosphatidylcholine; Spin label; EPR spectroscopy; Ethanol; Polymyxin B; Phosphatidylglycerol; Myelin basic protein 87, 1

Phosphatidylglycerol; Spin label; EPR spectroscopy; Ethanol; Polymyxin B; Phosphatidylcholine; Myelin basic protein 87, 1

Phospholipid; Phosphatidylcholine; Liposome; Vesicle; Electron microscopy; Freeze fracture 87, 65

Plastoquinol; α -Tocopherol quinol; Ubiquinol; α -Tocopherol; Antioxidant activity; Lipid peroxidation; Liposome 87, 73

Polydiacetylene; Gangliosides; Monolayers; Biosensors 87, 41

Polymyxin B; Spin label; EPR spectroscopy; Ethanol; Phosphatidylcholine; Phosphatidylglycerol; Myelin basic protein 87, 1

Porcine heart tissue; Ebselen; Hydroxy fatty acids; α -Hydroxyaldehydes; Lipid peroxidation 87, 149

Positional isomers; Acetylenic; NMR spectroscopy; Synthesis; Unsaturated tellura; Stearate analogues 87, 55

Rheuma; Hydroxy fatty acids; α -hydroxyaldehydes; LDL; Aging 87, 81

Silver ion chromatography; Bicyclic fatty acids; Cyclic fatty acids; Frying oils; Gas chromatography (GC); High-performance liquid chromatography (HPLC); Mass spectrometry; Sunflower oil 87, 137

Sphingosine; Transfection; Cationic liposomes; Diacylglycerol 87, 23

Spin label; EPR spectroscopy; Ethanol; Polymyxin B; Phosphatidylcholine; Phosphatidylglycerol; Myelin basic protein 87, 1

Static light scattering changes; Stratum corneum lipid liposomes; Liposome solubilization; Interaction stratum corneum liposomes with decyl, dodecyl and tetradecyl pyridinium bromide surfactants; Effective surfactant to lipid molar ratios; Partition coefficients 87, 159

Stearate analogues; Acetylenic; NMR spectroscopy; Positional isomers; Synthesis; Unsaturated tellura 87, 55

Stratum corneum lipid liposomes; Liposome solubilization; Interaction stratum corneum liposomes with decyl, dodecyl and tetradecyl pyridinium bromide surfactants; Static light scattering changes; Effective surfactant to lipid molar ratios; Partition coefficients 87, 159

Sunflower oil; Bicyclic fatty acids; Cyclic fatty acids; Frying oils; Gas chromatography (GC); High-performance liquid chromatography (HPLC); Mass spectrometry; Silver ion chromatography 87, 137

Synthesis; Acetylenic; NMR spectroscopy; Positional isomers; Unsaturated tellura; Stearate analogues 87, 55

Synthesis; Gemini; Neoglycolipid; Monolayers 87, 91

Time-resolved X-ray diffraction and calorimetry; Asymmetric phosphatidylcholine; Electron spin resonance; Metastable non-interdigitated gel lamellar phase 87, 111

α -Tocopherol; Plastoquinol; α -Tocopherol quinol; Ubiquinol; Antioxidant activity; Lipid peroxidation; Liposome 87, 73

α -Tocopherol quinol; Plastoquinol; Ubiquinol; α -Tocopherol; Antioxidant activity; Lipid peroxidation; Liposome 87, 73

Transfection; Cationic liposomes; Sphingosine; Diacylglycerol 87, 23

Ubiquinol; Plastoquinol; α -Tocopherol quinol; α -Tocopherol; Antioxidant activity; Lipid peroxidation; Liposome 87, 73

Unsaturated tellura; Acetylenic; NMR spectroscopy; Positional isomers; Synthesis; Stearate analogues 87, 55

Vesicle; Phospholipid; Phosphatidylcholine; Liposome; Electron microscopy; Freeze fracture 87, 65
